***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The original specification does not support the new limitations directed to "... the colorimetric chemical monitor corresponding to a fixed surface of a substrate."

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5-11 and 15-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jaduszliwer et al. (USP 5,747,348).

See the appropriate paragraph of the 11/21/07 Office action.

The new limitations "... the colorimetric chemical monitor corresponding to a fixed surface of a substrate" are not supported by the original disclosure. Even if there were support for these limitations, "... the colorimetric chemical monitor corresponding

to a fixed surface of a substrate” is sufficiently broad to be properly read on Jaduszliwer et al. Specifically, Jaduszliwer et al. teaches in column 1 line 65-66 the "... colorimetric tape moves at a constant rage past an air intake.” The Office has read the claimed "...fixed surface of a substrate” on the taught **air intake**.

### ***Allowable Subject Matter***

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Claims 2-4 and 12-14 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 1st paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### ***Election/Restrictions***

Claim 20 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected II, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/12/07.

### ***Response to Arguments***

Applicant's arguments filed 2/20/08 have been fully considered but they are not persuasive.

Applicant's state Jaduszliwer et al. fail to teaches the "... colorimetric tape moves at a constant rage past an air intake.” These new limitations "... the colorimetric chemical monitor corresponding to a fixed surface of a substrate” are not supported by the original disclosure. Even if there were support for these limitations, "... the

colorimetric chemical monitor corresponding to a fixed surface of a substrate” is sufficiently broad to be properly read on Jaduszliwer et al. Specifically, Jaduszliwer et al. teaches in column 1 line 65-66 the “... colorimetric tape moves at a constant rate past an air intake.” The Office has read the claimed “...fixed surface of a substrate” on the taught **air intake**.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
